Introduction

Resolve is a case management software developed to manage cases, which are service requests created by members of an organization, going through an approval workflow.

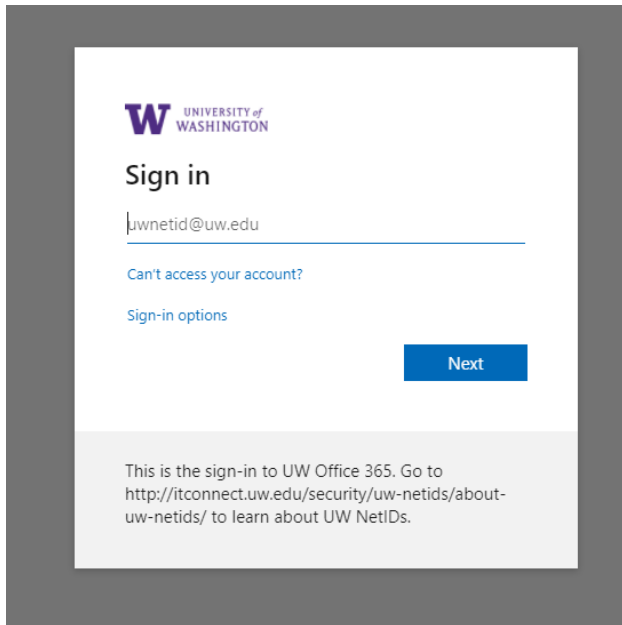

Authentication

Sign in

Sign up and Sign in is automatic when you visit the below mentioned URL

Application URL: <https://apps.dental.uw.edu/Resolve>

The first time you sign in, you will be asked to provide permission to ResolveProd to read your profile, after that you can sign in directly through the above link. You would require UW NET ID to sign in to Request Manager, as the application sign in page will redirect you to UW's NetID sign in.

A screenshot of the UW NetID sign-in page. At the top is the UW logo and the text "UNIVERSITY of WASHINGTON". Below that is the heading "Sign in". There is a text input field containing "uwnetid@uw.edu". Below the input field are two links: "Can't access your account?" and "Sign-in options". A blue "Next" button is positioned to the right of the input field. At the bottom, a grey box contains the text: "This is the sign-in to UW Office 365. Go to http://itconnect.uw.edu/security/uw-netids/about-uw-netids/ to learn about UW NetIDs."

Please sign in.

UW NetID:

[Need help?](#)

Sign in reduces how often you have to reauthenticate to access UW resources.

Learn how to [sign out](#) at the end of your browsing session.

[PRIVACY](#) | [TERMS](#)

Sign Out

To sign out of the application, you would sign out from the net id system, similar to sign out for other UW applications like Canvas etc.

Cases Assigned to You 1

Cases Assigned to Your Groups 2

Cases Created by You

This section contains Cases created by you to track. They will disappear from this area once the Case is completely processed by the approvers. You could track the status of the cases directly through this table and can view on whom is the case currently pending.

Cases Assigned to You

On expanding this area, you would see Cases that are assigned to you. These cases require your action as you are the assigned approver for those cases in the workflow. Once you take an action on the Case under this category (The action could be Approve/Reject/Cancel), the Case moves forward in the workflow and won't show up on your homepage, unless someone re-assigns the case to you, in any case you will receive an email notification as well.

Cases Assigned to your Groups

Cases that show up under this area are the ones that are pending and are assigned to someone who belongs to one of your groups. This area exists, so that you could pick up cases assigned to your groups, in case your group member is on leave (given the case is pending on that group member)

CASE10000036			17-Aug-20	SampleCaseType	

You can create a new request by going to “New Case”

Create Case

☒ OnBehalfOf

Select User (On whose behalf the request is being created):

pedo@uw.edu ▼

Don't see the User? [Create](#)

Case Type

SAR4 ▼

Description

First 50 characters of this description will be visible on homepage for easy identification...

Next

[Cancel](#)

You could create the Case on someone else's behalf, or for yourself. You would need to select the Case Type and fill out the short description. This description would show up on your and the approvers homepage and would help them to identify the Case they would be handling, so it is important that you write a short note briefly describing your request.

On the next page, you would be served a form that you would be specific to the Case Type you selected. You could edit the information at a later point in time as well, before the Case gets marked as processed.

Case Details

After a Case is created, you could then visit the Case Details page by clicking on the Case row on homepage.

CaseType	HiringAffiliateFaculty
Description	Test of Hiring Affiliate by Pedo

In this section you would see “Edit” button, which would remain enabled only until the Case is processed. A User can only edit the Case Description after a case is created.

The Assignments button shows the Approvers and Groups to which the case is **currently** assigned.

Here you can see the Status of the approver, which can be either Pending, Approved, Rejected or Cancelled. Under the Action column, you can see 3 options, either “NA”, or “Reassign” or “Assign to Self”. NA signifies that no action can be taken for that approver by you. The other 2 options are as described below:

Reassign

When this button appears, you (as an approver, if you are one to whom the case is assigned to) can reassign the case to someone else from your within your group who you feel knows more about the case and would be better suitable to handle it.

RequestManager

Reassign Case - CASE10000058

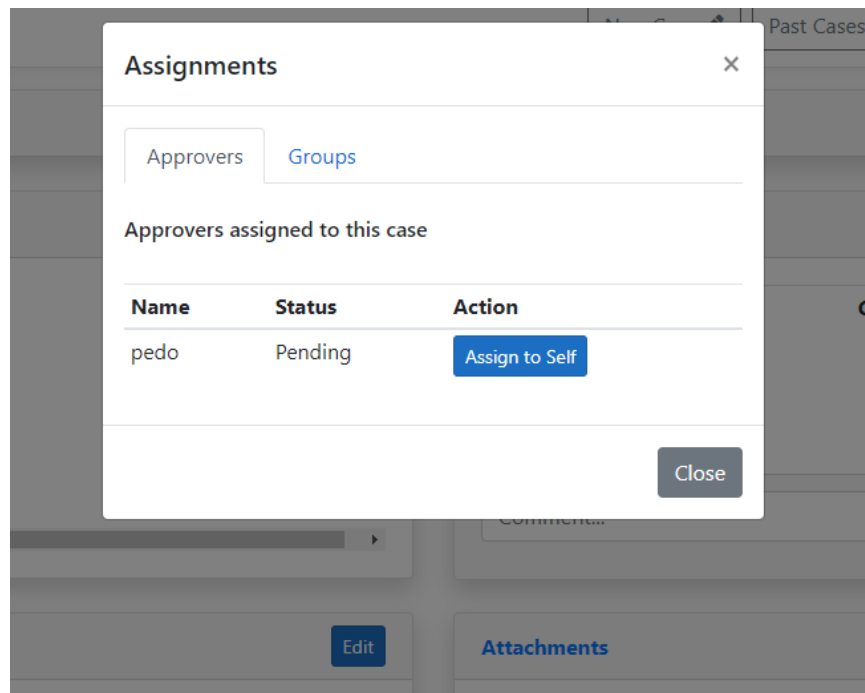

Select a group member from group: uw_sod_webapps_resolve-admins

Optional Comment...

Reassign

You would need to select the group member on the next page as shown above and provide an optional comment, so that the new approver knows why it was assigned to them.

Assign to Self

The screenshot shows a modal window titled "Assignments" with a close button (X) in the top right corner. Inside the modal, there are two tabs: "Approvers" (selected) and "Groups". Below the tabs, the text "Approvers assigned to this case" is displayed. A table follows with three columns: "Name", "Status", and "Action". The table contains one row with the name "pedo", status "Pending", and an "Assign to Self" button. At the bottom right of the modal is a "Close" button. The background of the page is dimmed, showing parts of a "Past Cases" table and an "Attachments" section.

Name	Status	Action
pedo	Pending	<button>Assign to Self</button>

Similar to Reassign, the “Assign to Self” button allows you to take up the case from your group member and assign it to yourself, if you think you would be better suited to handle the Case, or if your group member is on a leave.

Swap Approver with Self?
